I also noticed the table of contents needs some conforming changes, but I admit I didn't get farther than that, not yet anyway.

I read the CFR text.

It does not seem to mention Dave Johnston units 1 and 2, in order to make the compliance provisions apply.

Also, the title of Table 1 has an extra word.

Table 1

Emission limits for ~~BART~~ units for which

EPA approved the State's BART and Reasonable Progress determinations

In case someone wants to read the whole rule over the weekend here it is.

It just posted to the Air Program web site under the Hot Topic link "EPA's Final Action on Wyoming's 309(g) State Implementation Plan." We should probably change that title to add regional haze in there somewhere.

I sent a copy to Steve Dietrich (WYDEQ).

I think we are done with notification calls for today.
